

Project Initialization and Planning Phase

Date	25 September 2026
Team ID	6ab22227a614981d6d2c6451
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 (Data Integrity)	an HR Data Administrator	bulk import and update employee records from an Excel spreadsheet into ServiceNow	it often creates duplicate entries for the exact same employee	the standard manual upload process doesn't automatically identify and merge existing records using a unique identifier	frustrated and worried about corrupting the database with messy data
PS-2 (Analytics)	an HR Manager	get a clear, real-time overview of our employee distribution	I have to dig through massive list views or export data back to Excel to make sense of it	there are no centralized, visual reports or dashboards configured for our custom employee data	overwhelmed and inefficient when leadership asks for quick headcount metrics
