

Solution Requirements (Functional & Non-functional)

Date	25 September 2026
Team ID	6ab22227a614981d6d2c6451
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Functional Requirements:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User / Data Registration (Staging)	Upload Excel (.xlsx) file via the Load Data module. Automatically create the Staging Table (u_employee_import).
FR-2	Data Transformation	Create a Custom Target Table (u_employee_test). Configure Mapping Assist to map Source to Target fields.
FR-3	Data Integrity (Deduplication)	Configure the "Coalesce" feature on the Employee ID field. Process updates for existing records and inserts for new records.
FR-4	Analytics & Reporting	Generate Pie Chart report for Employees by Department. Generate Bar Chart report for Employees by Location.
FR-5	Dashboard Configuration	Configure ACLs (pa_dashboards) for Admin Overrides. Add generated reports to the "Employee Analytics Dashboard".

Non-functional Requirements:

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Dashboard must provide intuitive, easy-to-read visual analytics (Pie/Bar charts) for non-technical HR users.
NFR-2	Security	Access to dashboards must be secured via ServiceNow Access Control Lists (ACLs) using the Admin Overrides configuration.
NFR-3	Reliability	The Coalesce feature guarantees database reliability by preventing duplicate records and data corruption.
NFR-4	Performance	Transform Maps must efficiently process bulk Excel uploads (batch processing) with minimal system latency.
NFR-5	Availability	The solution is hosted on the ServiceNow cloud (SaaS), ensuring 99.9% uptime and continuous access to reports.
NFR-6	Scalability	The Import Set infrastructure can seamlessly scale to handle thousands of employee records in future uploads.
