

Problem – Solution Fit Template

Date	25 September 2026
Team ID	6ab22227a614981d6d2c6451
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Problem - Solution Fit Canvas

1. CUSTOMER SEGMENT(S) - HR Data Administrators - System Administrators & HR Managers	6. CUSTOMER CONSTRAINTS - Limited coding/SQL knowledge - Strict time limits for reporting - Fear of breaking live database	5. AVAILABLE SOLUTIONS - Manual row-by-row data entry - Writing custom SQL scripts - Legacy HR offline tools
2. JOBS-TO-BE-DONE / PROBLEMS Need to safely migrate bulk employee data from Excel to a database without creating duplicates, and instantly generate visual reports.	9. PROBLEM ROOT CAUSE Lack of a safe staging area and the absence of a primary-key matching system (like Coalesce) in basic manual upload tools.	7. BEHAVIOUR Manually searching for existing Employee IDs before typing new data; struggling with complex Excel pivot tables.
3. TRIGGERS Receiving massive Excel sheets of updated employees at month-end.	10. YOUR SOLUTION ServiceNow Data Pipeline: Using Import Sets and Transform Maps with "Coalesce" on the Employee ID for flawless deduplication, outputted to interactive Dashboards.	8. CHANNELS OF BEHAVIOUR Online: ServiceNow UI, Email. Offline: HR status meetings.
4. EMOTIONS: BEFORE / AFTER Before: Stressed, overwhelmed. After: Confident, productive.		

Canvas Section	Details for your Project
1. Customer Segment(s)	HR Data Administrators, System Admins, and HR Managers.
2. Jobs-to-be-done / Problems	Migrating bulk employee data from Excel into the central database quickly, without creating duplicate records, and visualizing that data instantly.
3. Triggers	Receiving a massive, updated Excel sheet of employee details at the end of the month that needs to be urgently entered into the system.
4. Emotions: Before / After	Before: Stressed, overwhelmed, and afraid of corrupting the database. After: Confident, relieved, highly productive, and visually informed.
5. Available Solutions	Manual row-by-row data entry, writing custom SQL scripts to check for duplicates, or using older legacy HR tools.
6. Customer Constraints	Limited backend coding knowledge, strict time limits to get reports to management, and fear of breaking live data.
7. Behaviour	Manually searching the database for existing Employee IDs before typing in new data, or struggling to create pivot tables in Excel.
8. Channels of Behaviour	Online: ServiceNow platform, Email (receiving files). Offline: Status meetings discussing headcount and data errors.
9. Problem Root Cause	Lack of a safe "Staging Area" for data, and the absence of an automated primary-key matching system (like Coalesce) in basic manual upload methods.
10. Your Solution	Using ServiceNow Transform Maps with "Coalesce" on Employee ID for flawless deduplication, combined with custom Dashboard reports for instant visibility.
